

Interactive Menu Solutions for Restaurants, Cafés, Bars and Hotels

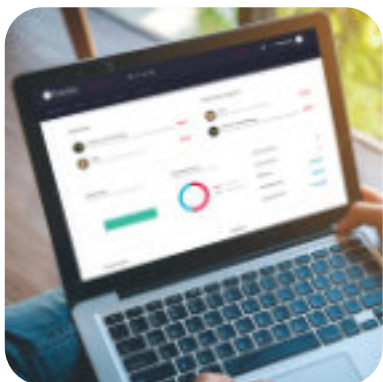

Digitization is Inevitable!

46% of people aged between 25-34 consider themselves “foodies”. They value food and dining in a way that was never done by older generations. These consumers don’t just want to eat because they’re hungry; they want to see the thought and effort put into a recipe to decide if it’s worth eating.

Every meal has a unique story, but it can not be told with a paper menu.

A great meal starts with the menu

The one thing every single customer interacts with is the menu. You can get your customers hungry with a visually striking, contemporary digital tablet menu. Appetizing visuals and tasty descriptions make it easier than ever for your diners to decide what they’re hungry for.

Boost Your Revenue with FineDine

FineDine, World’s #1 digital menu platform, digitizes restaurant menus to help diners make easier purchase decisions and increase restaurant revenue by 15% on average.

Tablet Menu

Impress your customers and increase your revenue

- ✓ Cross-selling & Upselling for Higher Revenue
- ✓ Offer your customers a menu with vivid pictures, food descriptions and unique interactive experience.
- ✓ Get real-time data on your service and quality

Features

Real-Time Menu Management

FineDine's cloud-based control panel allows you to make changes on your menu anytime and update all your menus with one click. You can make temporary changes, add daily or seasonal specials, update prices, and create campaigns anytime, anywhere.

Seamless Payment

FineDine integrates with payment systems to allow restaurants to take orders and collect payment directly over the application.

Collect Real-Time Feedback

Create fully customized feedback forms to get the answers you need from your customers. You can collect real-time data on your service and quality to address negative situations immediately before the guest leaves the restaurant.

Make Smarter Decisions

The time your guests spend on the menu is precious. FineDine gives you a summary of the most/least viewed items along with most/least sold items and revenue share across sections. The system keeps track of the average check size and the table turnover ratio to help you measure the performance of your restaurant. You can check daily sales on the dashboard and observe the effects of the smallest change.

Let Your Guests Place Orders Themselves

Guests place their orders on FineDine without any help. The orders are sent to the kitchen instantly and can be managed on the control panel, printed by kitchen printers, or synced to the POS system.

- Service time is improved as the chefs start preparing the meal right away.
- Customer satisfaction is increased by eliminating errors in communication.
- The need for service personnel is decreased in the long run, increasing efficiency in staffing.

Popup Campaigns

Generate more profit by promoting your special offers or advertising other businesses.

Flexible Design Options

Design your menu to reflect your business. Create new themes for special occasions and seasons to keep your customers engaged.

Smart Recommendations

Display recommendations and food pairings for each item to direct guests into ordering more. This is the new way of asking, "Would you like a drink with that?"

Same Content in Different Languages

FineDine supports over 30 languages to allow you to display your menu in different languages and offer helpful information for all guests.

KAMAL YURUK
Manager, Spiro's

“ Since we started using FineDine, we increased our liqueur and food sales by about 15-20%. Which is insane, which is so dramatic for a business. And that's a big increase by just using software and using it properly. ”

LAURA BENITEZ
Manager, Imperio Restaurante

“ I can create multiple menus and use them based on seasons or special occasion like mother's day. Doing something similar with paper menus would be time and money consuming because it requires reprinting for even small changes on the menu. Our customers are fascinated by the variety! ”

DAVE LUIS
Manager, L'Artisan du Burger

“ Phenomenal app – gives you such control over your menu for adding/removing items, amending prices, adding specials etc without having to go to the massive expense of a reprint each time. ”
